MCTC SAFETY WEEK

The well-being of our construction crews and neighbors is our top priority during construction of the Mid-Coast Trolley project, which is why we invest time in regular safety practices. Recently, our contractors took part in Safety Week, a week-long program dedicated to reinforcing safety protocols and procedures. Not only does Safety Week ensure our crews have the most up-to-date information about safety practices, it's also a great way for participants to share safety philosophies and be reminded that it's everyone's duty to protect quality of life on and around the job site.
